How We Will Calculate Your Balance: We use a method called "average daily balance (including new transactions)."

How We Will Calculate Your Variable APRs: Variable Rates are calculated by adding an index and a margin. The Index is the highest Prime Rate published in the "Money Rates" section of *The Wall Street Journal* on the 10th day of each month. If the 10th falls on a day *The Wall Street Journal* does not publish, we will identify the Prime Rate published on the last publishing day preceding the 10th day of the month. The margin is the percentage we add to the Index to calculate the APR. As of 3/1/2026, the index was 6.75%. After your account is opened, changes to the Index will cause a corresponding change to your variable rate.
